

STYLE BETON

Release Powder

<p>DESCRIPTION</p>	<p>The Style Beton Release Powder, is a dry mixture of hydrophobic powders, special ingredients and color Bayer, for use in the process of stamped concrete. The main use of this product is to prevent the adhesion of fresh concrete molds during stamping. In parallel, Release Powder Style Beton adds color variations and highlights the embossed surface, giving an attractive two-tone, in imitation of natural materials such as stone, bricks, tiles and granite.</p> <ul style="list-style-type: none"> • 5 different colors are available in containers weighing 13,00 kg per piece. • The colors are resistant to ultraviolet rays, acids and salts. • Covers 80 m per container weight 13,00 kg. • Washed with fresh water.
<p>Colors</p> <p>Restrictions</p> <p>Packaging</p> <p>Storage</p>	<p>Available in 5 colors.</p> <p>Do not apply the product of the likelihood of rain, the temperature of the substrate below 5 ° C and above 30 ° Celsius.</p> <p>13 kg</p> <p>At room temperature, in the original container. Protect from moisture.</p>
<p>Application</p>	<p>After the concrete is colored with Style Beton Color Hardener and reaches the right time for stamping the concrete surface, releasing evenly across the surface the Style Beton Release Powder. Care must be taken not to have surplus water to the</p>

	<p>surface of the concrete. This will cause lasting intense color.</p> <p>After applying the Release Powder Style Beton, following the standard procedure to stamp the concrete. Wash after two days with fresh water.</p>
